

## ecosmart Solutions

Featuring an innovative eco-click device, which can help reduce water usage by up to 72%, Bristan ecosmart's basin tap collection will help you to save water without compromising on style.

**Java** Oozing with style, Java's cool, curvy lines make it a must-have in the bathroom.

**Prism** Prism's modern yet minimalist design will bring a touch of cool sophistication to any décor scheme.

**Quadrato** Featuring a stylish, edgy design and a polished chrome finish, this eye-catching tap will make a real statement.

**Jupiter** A modern design with an easy to use handle which looks great in any bathroom.

Running taps use 8.5 litres of water every minute - that's a lot of water down the plughole.

## Shower Cap

By fitting a simple flow limiter to your shower, the average family could save around £400 a year.\*

\*Based on a family of four using a shower for ten minutes every day at an average cost of 22p per minute.

We all love our showers, and while they use much less water than a bath, there are still savings to be made.

Bristan's Artisan shower has an innovative eco button which helps save up to 50% of water usage while you shower. Available in a range of fitting options, Artisan features a contemporary design and a thermostatic control with a 38°C safety stop.

## Go with the Flow

Flow limiters are a cheap and easy way to reduce water usage in the bathroom. Fit them to your taps and showers to reduce water flow to as low as one litre a minute on taps and four litres a minute on showers.

Small changes. Big savings...

# Get Smart. Get ecosmart.

We may be sick of rain in the UK, but water is a precious resource and if we don't act now, the world's supply is in danger of eventually running out.

Not only that, but at a time when we're all thinking about our pennies, saving water in the home can make a real difference. Saving water means saving on the energy you need to heat it, which in turn will help save you money.

Bristan's ecosmart range has been designed to help you save the amount of water that's typically wasted in the bathroom. 35 Bristan products have the Bathroom Manufacturers Association Water Efficient Labelling Scheme approval too. The aim of the scheme is to help identify water efficient products that when installed and used correctly use less water than other products available on the market.

## Did you know?

- ? The average Brit uses 150 litres of water every day - a third of this is used flushing the loo.
- ? Domestic heating water accounts for 5% of the UK's CO2 emissions.
- ? At least 25% of your household's energy bill comes from heating water - that's not including the central heating.
- ? The energy used to pump, treat and heat the annual water usage in the average family's home produces the carbon equivalent of a return flight from London to New York.

Find out how much money you could save with ecosmart products:

Take a look at our online calculator at [www.bristan.com/ecosmart](http://www.bristan.com/ecosmart)

## Suite Savings

Every day we flush 1.2 billion litres of water down our loos. By installing dual flush WCs, which include a 'short flush' option, we can significantly bring this wastage down.

Start the savings with Bristan's brilliant Dune sanitaryware. The ultimate in eco chic, Dune can be combined with reduced flow tap and shower products for real water savings.

**Dune bath** With a capacity of 140 litres, compared to the standard 195 litre models, this smart bath will still let you have a lovely soak, without wasting too much water.

**Dune basin** Featuring a stylish and simple design, the Dune basin combines perfectly with the bath and WC to create a total water saving bathroom solution.

**Dune WC** Using just 2.6 litres per flush - that's 70 per cent less than the average 9 to 11 litre model - Dune will help you save the amount of water you waste down the pan.

**TOP TIP** Turn off the tap when you brush your teeth and save as much as 6 litres of water per minute.

## Tap Tips

Taps deliver around 20 per cent of domestic water. Most of this (usually hot) water goes down the plug hole without performing any useful purpose.

## Water Savings on Tap

Bristan's ecosmart spray taps offer an ingenious way to save water; the spray mechanism aerates the water to give a bubbly flow while using much less water. Available as basin taps or basin mixers.

## Effortless savings

Leaving taps running is a huge waste of water. Bristan ecosmart's range of self-closing taps are designed to work for between 9 - 15 seconds before automatically turning themselves off. As well as saving water, it will stop your worries about overflowing basins.

**TOP TIP** For cooler water, turn the hot tap down, rather than the cold tap up - it saves more energy.

Water efficient products

# eco click

helping to protect the environment

eco click is an innovative water saving feature. The cartridge offers a subtle resistance as it reaches approximately half of its full flow capability, saving water. For increased flow, the eco click feature can be overridden.

At full flow the eco click cartridge uses 32% less water than a standard cartridge. When in eco click mode, the reduction increases to an impressive 72%.

Just look for this symbol for eco click products.

# Flow limiters

helping to protect the environment!

Balancing environmental issues such as climate change, resource use and effects to wildlife with today's demands for a high quality, safe and healthy home environment, is a challenge we are all faced with. In accordance with this challenge, Bristan offer a range of flow limiters to reduce water consumption, which in-turn will lower harmful effects to the world's environment and reduce running costs.

#### Flow Limiters -

Suitable for use with the majority of Bristan basin pillar taps, basin and sink mixers.

Flow rate reduced to:	Order Code	Price
6 litres per minute	ECO BAS6	£4.45
6 litres per minute	ECO TAP6	£1.40
5 litres per minute	ECO TAP5	£1.40
4 litres per minute	ECO TAP4	£1.40
3 litres per minute	ECO TAP3	£1.40
2 litres per minute	ECO TAP2	£1.40
1 litres per minute	ECO TAP1	£1.40

• Reduced flow rate • Economically beneficial • Environmentally friendly
